

ENTERPRISE CLOUD - MANAGED VMware

WE LIVE AND BREATHE VIRTUALIZED INFRASTRUCTURE SO YOU DON'T HAVE TO. IT'S OUR PASSION. IT'S OUR LIFE'S WORK.

Since 2000, ServerCentral has designed, developed, and managed custom infrastructure solutions. We've seen what works, as well as when and why it works best. This experience is the foundation of our Enterprise Cloud—a fully managed VMware solution. Our Enterprise Cloud has been architected to deliver the best possible shared VMware cloud to meet your specific needs, not our own, topped with unparalleled 24x7x365 support provided by system administrators, not customer service representatives.

MANAGED VMware: BALANCE COST & PERFORMANCE

Our Enterprise Cloud is architected for unparalleled reliability, which includes support. Managing VMware, VM growth, VM migrations, and connecting physical and virtual resources all take their toll on your team. That's why Enterprise Cloud is designed to address these issues for you. We will help you architect your deployment, whether it's a single resource pool or a high-availability solution spanning multiple zones.

REASONS FOR USING ENTERPRISE CLOUD

Why do companies choose a shared Enterprise Cloud instead of a Private Cloud? In our experience, it consistently comes down to these reasons:

COST VS. PERFORMANCE

They need to optimize their application performance with their budget.

TEST/DEV

They need to spin up VMs only as needed for Dev/Test, QA, etc.

SHORT-TERM APPLICATIONS

They need to expand resources to support your busy season.

SCALING YOUR ENTERPRISE CLOUD

Our Enterprise Cloud is not just managed VMware suited to short-term deployments. We've architected this high-availability cloud to provide you with custom configured resource pools to help you quickly and cost-effectively scale your VMware deployment — or to build a new, right-sized cloud for your business requirements today and in the future.

HIGH-AVAILABILITY ENTERPRISE CLOUD CONFIGURATIONS BEGIN AT \$175 PER MONTH AND INCLUDE:

3

vCPUs

12

GB RAM

60

GB SSD storage

1 TB

monthly transfer

VMware vSphere 6 | Software firewall | Software load balancer | 64 IPSEC tunnels | Open Source OS | 24x7 support

Additional Enterprise Cloud resources can be added in individual increments for vCPUs, RAM, Storage and Bandwidth to meet your specific requirements. Enterprise Cloud is not one size fits all. Contact us at sales@servercentral.com or visit <https://www.servercentral.com/cloud> to learn more and get started.

WHY CHOOSE SERVERCENTRAL'S ENTERPRISE CLOUD

There are many reasons to select ServerCentral's Enterprise Cloud, including:

ADVISORY SUPPORT

Get advice from experienced cloud architects so you're certain you have the cloud you need for today and tomorrow. Think VMware, with butlers.

HIGH-AVAILABILITY

We deliver our Enterprise Cloud one way: in true high-availability configurations.

VM MIGRATION

We'll work with you to ensure your physical-to-virtual and virtual-to-virtual migrations occur with minimal downtime and full transaction integrity.

24/7 SUPPORT

Expert cloud support is available at no extra cost. We can talk over the phone, email, even face-to-face. We're here when you need us—and even when you don't.

MANAGED VIRTUALIZATION

We take care of everything from the infrastructure through VMware. This means we're focused on compute, memory, storage and bandwidth, while you're focused on your apps.

17 YEARS OF EXPERIENCE

We've been architecting virtualized infrastructures since 2000, so we bring strong technical and business knowledge to every engagement.

FULL-STACK MONITORING & REPORTING

Know how your cloud is performing in real time to make informed decisions about resource utilization.

DISASTER RECOVERY PLANNING

We work with your team to determine how to best address outages with our Backup, Replication, and Disaster Recovery solutions.

PROVEN VIRTUALIZATION TECHNOLOGY

We've built our high-availability Enterprise Cloud in partnership with the industry's leading virtualization technology:

WHAT TO EXPECT

We'll help you identify the best resources possible for your applications and provide clear and concise pricing.

YOUR SPECIFICATIONS

We'll identify the resources you need and provide clear and concise pricing.

WE CONFIRM

If everything looks good, we'll provision your Enterprise Cloud resources.

YOU DEPLOY

Log into our cloud portal to provision, deploy, and monitor your cloud.

SCALE IMMEDIATELY

We provision the additional resources right when you need them.

WHAT SHOULD YOUR CLOUD LOOK LIKE?

Every organization has different expectations of and requirements for their cloud. ServerCentral's Enterprise Cloud means you receive OpEx-based virtualization based on the industry standard, VMware, and unparalleled support. The result? You're focused on one thing and one thing only: your business.
