

MANAGED BACKUP, REPLICATION, AND DR SOLUTIONS

WE LIVE AND BREATHE MANAGED INFRASTRUCTURE SO YOU DON'T HAVE TO. IT'S OUR PASSION. IT'S OUR LIFE'S WORK.

WHAT'S YOUR BUSINESS CONTINUITY/DR STRATEGY?

Every organization has different expectations of and requirements for their backup, replication, and disaster recovery infrastructure. Some organizations may be focused on backing up key applications with acceptable Recovery Time Objectives (RTOs) measured in days. Other organizations may be focused on automatic failover for mission-critical applications, where acceptable RTOs are measured in minutes or even seconds.

MANAGED BACKUP, REPLICATION, AND DISASTER RECOVERY

At ServerCentral, we know managing backups, replication, and disaster recovery infrastructure takes a toll on your team. That's why we provide fully managed solutions to address these issues for you. Every ServerCentral Managed Backup, Replication, and Disaster Recovery Solution is architected specifically for your applications and delivers unparalleled reliability.

Choose from turnkey solutions or completely bespoke infrastructure—all including 24/7/365 high-level support from system administrators—not customer service reps.

SERVERCENTRAL MANAGED BACKUP, REPLICATION, AND DISASTER RECOVERY SOLUTIONS

BACKUP

-  **Backup Targets**
Bring your own backup process
-  **File Backups**
Managed file/file server backups
-  **Application Backups**
Managed application/application server backups
-  **Virtualized Environment (VM) Backups**
Managed VMware, Hyper-V, KVM, XEN backups
-  **Veeam Cloud Connect**
VM backups with VCC

REPLICATION

-  **Long RTO/RPO**
Applications and data have recover requirements measured in hours/days
-  **Short RTO/RPO**
Applications and data have recover requirements measured in minutes/hours

DRaaS

-  **Manual failover**
Declare an event to trigger failover to your physical or virtual environment
-  **Automated failover**
Pre-defined events or system parameters automatically trigger failover to your physical or virtual environment

PROVEN PARTNERS

We partner with the best in the business to deliver solutions you can rely on.

ALL APPLICATIONS ARE NOT CREATED EQUAL

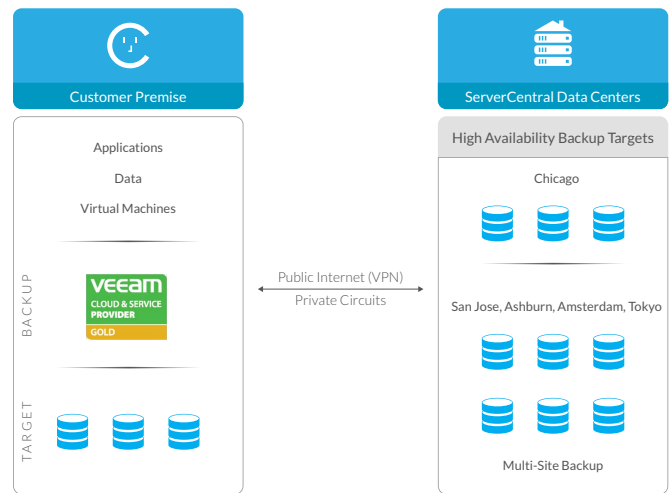

What makes ServerCentral truly unique is that we work with you. ServerCentral experts are here every step of the way 24/7/365 to work with you to design, deploy, and manage backup, replication and disaster recovery solutions that are right for your applications. A ServerCentral Managed Backup, Replication or Disaster Recovery Solution means you are focused on one thing and one thing only: your business.

PROVEN SOLUTIONS

Since 2000, ServerCentral has designed, developed, deployed, and managed custom infrastructure solutions for industry-leading companies. Using this experience we will architect the best possible backup, replication, and disaster recovery solutions to meet your specific needs.

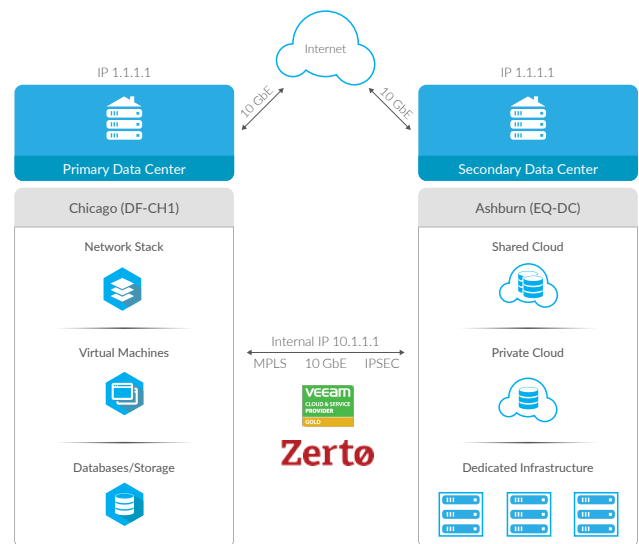

BACKUP REFERENCE ARCHITECTURE

Our Managed Backup solutions—powered by Veeam—deliver high-performance, high-availability storage targets that maintain two copies of your data.

REPLICATION AND DRaaS REFERENCE ARCHITECTURE

Our Managed Replication and DRaaS solutions—powered by Veeam and Zerto—deliver the peace of mind you need whether your applications and data have recovery requirements measured in seconds, minutes, hours or days.
