

VEEAM CLOUD CONNECT WITH SERVERCENTRAL

Avoid the risk of catastrophic data loss in case of a site disaster through hosted backup repositories with Veeam Cloud Connect. It's the easy, efficient way to get backups offsite to ServerCentral.

ABOUT SERVERCENTRAL

Since 2000, ServerCentral has designed, developed, deployed, and managed custom infrastructure solutions for industry leading companies. Whether you're simply pointing your existing backup or replication solution at our high-availability targets or seeking a multi-site DR solution, we can support you and your team.

WHAT'S INCLUDED

INSTANT SUPPORT

Talk to a person, not a phone tree

EASY INTEGRATION

Set RPOs per application

THE BEST TARGETS

High-availability, high-performance, production-quality targets

100% UPTIME SLAs

Zero downtime on network and power

HOW IT WORKS

Customer On-Premises Infrastructure

RTO & RPO REQUIREMENTS

Recovery time objectives (RTOs) and recovery point objectives (RPOs) vary significantly from service to service. Your requirements may be as simple as pointing to a high-performance, high-availability target for an existing Veeam deployment, or as complex as multi-site backups with reserved compute instances to spin up if needed.

At the end of the day, choosing ServerCentral for a Veeam Cloud Connect target means that you can focus on your business and leave the rest to us. We'll be here for you every step of the way.

WHAT TO EXPECT

STEP 1

Request an estimate. We'll send you a quote with a service agreement for you to sign.

The more information you provide, the more accurate the estimate.

STEP 3

Back up your data.

All data and VMs are stored on ServerCentral's high-availability, high-performance target.

STEP 2

Configure Veeam Availability Suite.

Select ServerCentral as your service provider target.

STEP 4

Data can be restored, in whole or in part, as needed.

You can count on our recovery experts 24/7/365 for immediate help.

PRICING

Pricing starts at \$75/TB/mo. Complete this [form](#) or email sales@servercentral.com to get started.
